Deck boxes

- We can also treat the boxes with special finishes to make them stand out, such as:

Spot UV

Linen Texture

Golden / Silver Foil

Embossing

Foil Embossing

Box Showcase

SG suggestions: If the size of your box is less than 300*300mm, it is recommended to use a 1.5mm gray board, if it is larger than 300*300mm, it is recommended to use a 2mm gray board, and it must use PP lamination but varnish, which can make the box more durable.

Game Board

The board is a central element of almost every board game. At Sunday Games, We can make any number of folds and size for the game board, with reinforced edges to prevent wear. A lot of different materials are available to satisfy your need for a perfect game board.

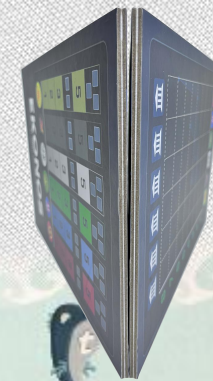

- Game board configuration examples

Game Board Showcase

SG suggestions: Usually, the gameboard uses a 2mm gray board, and use matte/glossy PP lamination to make it more durable.

Punchboard

SG suggestions: In order to get the quotation faster and better, suggest passing the size , shape, and quantity of the tokens to the manufacturer in advance, And it is recommended to use a 1.5mm gray board, printing in 4/4C.

Punchboard can increase the fun of the game and control the cost better.

Cards

The card can play a role whatever you want. They are both an essential component in many games and can constitute a separate item in the form of a traditional deck. Our cards are produced in a number of different sizes and shapes, Sunday Games offers a wide range of stock differing in weight, cores, and finishing, and we will help you find the best solution within a proposed budget.

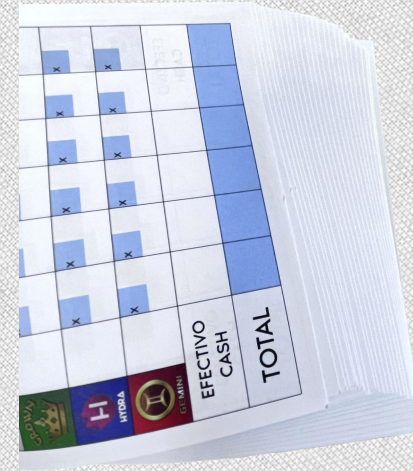

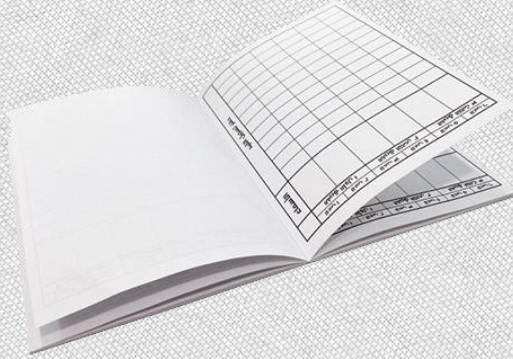

SG suggestions: Commonly used materials are 280g black-core paper/280g blue-core paper/300g white-core paper/320g blue-core paper/350g white-core paper. Common sizes are 88*63mm/68*44mm/120*70mm.

Scorebook

SG suggestions: In order to get the quotation faster and better, suggest passing the sheets and size to the manufacturer in advance, And it is recommended to use an 80gsm paper, printing in 1/1C.

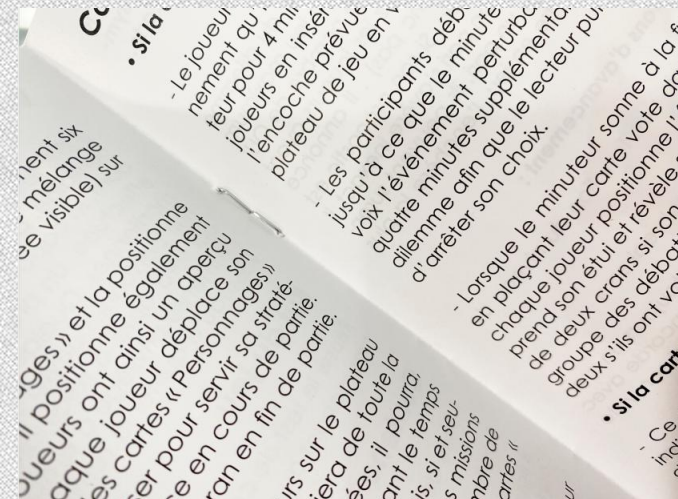

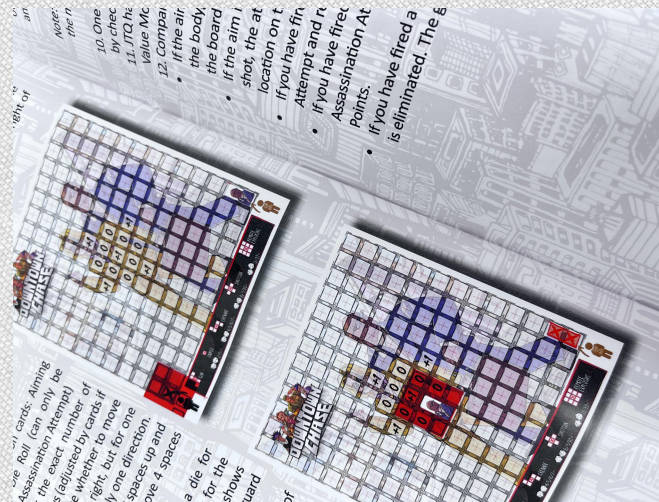

The Scorebook is important. It is the official game record and is used to record every pitch, at-bat, and defensive play.

Rulebook

SG suggestions: In order to get the quotation faster and better, suggest passing the pages and size to the manufacturer in advance, And it is recommended to use a 115gsm / 128gsm / 157gsm paper, printing in 4/4C.

The manual is the soul of a game, you deserve the clearest font and the best touch.

Miniatures

SG suggestions: In order to get the quotation faster and better, suggest passing the size to the manufacturer in advance, And it is best if you have the 3D files, suggested materials are PVC #95.

Sunday Games can help you manufacture miniatures in any size and shape you might like. We can produce the miniatures in both resin and plastic, depending on your preference. Just provide us with a digital 3D model file, which will quickly bring your miniatures to life.

Wooden Pieces

Wooden components can be made in a wide variety of shapes and sizes. It is a very universal and cost-effective material. Besides the standard pawns, meeples, cubes, discs, and triangles that we have in stock, we can also do custom shapes for wooden components. We then either paint them or use laser engraving for highly precise detailing. Take action and tell us your needs.

Plastic Pieces

Just tell us what you want, we can quickly bring everything in the universe to you. Let us be your superman.

Dice

There is a lot that can be done with dice. But we can do more for Dice. Whatever you prefer!

Trays

SG suggestions: If your components are simple, suggest using a paper tray. It can help you save costs. and the suggested materials for the plastic tray are PS0.8mm/1mm/1.1mm/1.3mm.

Make your baord game look more luxurious.

Game Production Services

Throughout the production process, Sunday Games is here to assist, advise and help you with anything you may need. After delivery, we will also follow up on your sales at any time, collect feedback, so as to provide you with better services in the future

Consultation

Our well-trained and experienced team can help you understand your game's technical requirements, and help you select the right materials to achieve your desired player experience and production quality at a competitive price point. The majority of our staff in the marketing team have a mechanical engineering background and are well versed in the fields of printing, plastic injection, and machining processes.
